

3D Folded House Card Assembly Instructions

1

Step 1: Remove from Envelope

Carefully slide the house card out of the envelope.
Unfold the card so the outside of the house is facing you.

2

Step 2: Raise the Roof

Gently lift both sides of the roof upward.

Fold each side of the roof outward along the pre-scored lines.

The roof should point outward at an angle, creating dimension.

3

Step 3: Form the House

Slightly press the left and right sides of the house inward.

This will allow the structure to bend into a square shape, forming the 3D house.

4

Step 4: Lock the Shape

Insert small tabs on the top both of the roof sections into the slots at the peak of the house to hold the house shape.

Step 5: Display

Your card is now a freestanding miniature house!
Perfect for displaying on a mantle, shelf, or holiday table.

5

Tips:

For best results, fold on a flat surface.

For an extra special touch, place a **battery operated only** tea light inside the house to light it up for the holidays!
